Dear Yabbala

O

- John
write this

I have to

in a terrific
hurry as Mr Harry Plant will
be here (soon I hope!) &
may take this for me to Darwin
I have forgotten about
the Dr Scholl's Metatarsal Arch
Supports for "Yantle's" hooves shoes
(mine) I do need them.

It is Dr Coomb's "good" ^{no.} It seems

to be? - (in regard to Curundjis & Wattie Creek plan?) "newspaper said he was impressed by them"

(3) When do you leave for London?

(4) I hear Miss Wilson has "rosy cheeks" + "is nice" (of Emmabella + your school-time friend). Is that right? How does she keep

"rosy cheeks" in the arid region??

5. Did you make any useful use of "Land Ownership"? You were a "calfombed nuisance, John dear, as I was not well during all your visit (taking heart tonic + other medicine) both

to appear all the time

3, the others (from Canberra)?

Do (scribe if you like) a
real account of the Currundji
situation ^{no just open words!!!} (AND NOT Peacock Quise's

Dean's visit
to try to persuade them to have
"a town"!!! Instead of Wattie (Q)
Those two are "SWINE" (my dead
farmer-brother's word & I learnt it
near Kellerberrin (in 1911-12)

My warm regards ^{w. aus} to your mother
& do write an informative letter.
SOON. - Wiairba! / abbula from

Abbula
Abbula

(Continued) days you came

over: - + them to be pressed
O for "Land Owners" was

"the last straw" as I had to
drag out heavy (iron) boxes
to hunt for it! - ^{Even} So if I am

not a "leper-nigger" - a doctor
^{should} show a little more observation
of poor old Yabbula's tiredness.

So I hope my effort was useful
- to aborigines!!! (of you).

Have you met Wentworth &
